SINGLE MODE G.652.D ADSS (ALL DIELECTRIC SELF-SUPPORTING) SINGLE JACKET AERIAL OPTICAL FIBER CABLES

ADSS (All Dielectric Self-Supporting) Aerial Optical Fiber Cables. ADSS Optical Fiber Cables are solution for High Performance Aerial Environments including Power Transmission and Distribution Networks. All-Dielectric Construction reduces installation costs by avoiding the need for expensive cable shielding and grounding. These cables are manufactured according to international standard.

Applications: Aerial Installation - Lightning Protection - Junction Communication System, Subscriber Network System.

Cable Constructions: Loose Tube Filled With Gel-Stranded around Central Strength Member - Dry Core - Core Wrap - Water Blocking Material - Peripheral Strength Member (Layer of Aramid Yarn) - Polyethylene Outer Jacket

Technical Characteristics

- The unique extruding technology provides the fibers in the tube with good flexibility and bending endurance
- The unique fiber excess length control method provides the cable with excellent mechanical and environmental properties
- Multiple water blocking material filling provides dual water blocking function
- provides good crush resistance

Features & Benefits

- Supports all grades of Single Mode & Multimode Fibers
- Cable round profile minimizes wind loading and tensile and ice loading (reducing cable SAG and Tensile Force)
- All dielectric Loose Tube Design is immune to Electro Magnetic Interface
